

PANTOPIX

Turning information into value

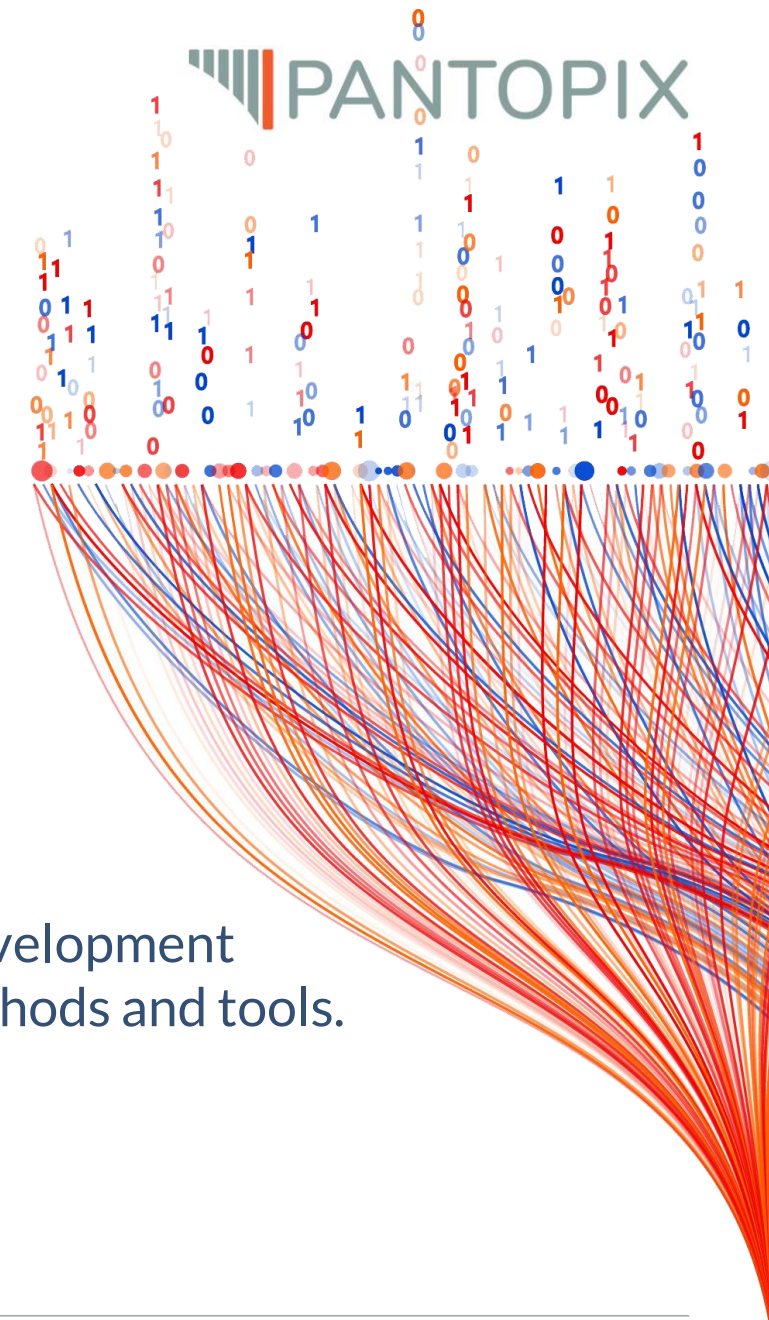

About us

PANTOPIX.

We provide intelligent information and turn them into value.

With our many years of expertise, we support our customers in optimizing their information processes and ensure the maximum added value of their digital data.

We accompany our customers in the analysis of existing processes, the development of new concepts and the introduction and integration of new systems, methods and tools.

Our Milestones

The network expands

In order to support customers in the implementation of their projects, PANTOPIX will work closely with **axxepta solutions** and **SB Con** in the future.

PANTOPIX repositions itself

PANTOPIX joins forces with network partners **axxepta solutions** and **SB Con** to offer customers everything from consulting to implementation and operation of the systems from a single source.

Our corporate mission

Turning information into value.

In close dialogue with our customers, we develop independent, innovative and customized solutions that optimise processes and provide information intelligently.

Together with our customers, we go the extra mile to shape the digital future of technical documentation.

Customer focus and customer success.

Innovation and further development.

Transparency and appreciation.

Trust and reliability.

Our Services

Our services: As a complete solution. Or as individual services. Tailored to the needs of our customers.

Consulting

We advise our customers independently and competently. In close dialogue, we analyse their systems and data and optimise existing information processes.

Implementation

Together with our customers, we select a suitable content delivery system - and take care of the necessary data models, data migration, integration of interfaces and digital publications.

Operation

We are also there for our customers after the system has been introduced: we keep their data running and provide the optimal infrastructure.
