DOCU-CHECK®

What is that?

The Docu-Check® is an independent assessment of your operating instructions or similar documents based on directives, standards and other key documents. The Docu-Check® is based on the many years of practical experience of your established service provider, SL innovativ GmbH.

What does it involve?

For Docu-Check®, we work through a checklist we developed based on directives and standards. Your document is compared with the appropriate specifications and requirements, item-by-item. We write in-depth comments for all items checked. They help you implement the items commented – of course, we can also do this work for you.

Who does it?

Experienced and practically-focused technical writers assess the documents, and write the required in-depth comments. The final quality assessment is performed by Mr. Lierheimer, our publicly appointed and certified expert on technical documentation (by Chamber of Industry and Commerce, IHK) – better safe than sorry!

On request, we can discuss the results with you and draw up a roadmap for further actions.

What benefits does it give you?

- It gives you certainty that your work is up to standard – or will be in future!
- Verification that you have fulfilled the requirements for operating instructions for your machine in accordance with Appendix 1 of the Machinery Directive (2006/42/EC) or other standards or directives.
- Fulfillment of the requirements for internal quality assurance.
- Certainty for your documentation manager that you can not only provide the authorities with the operating instructions, but also a document checked in accordance with the machinery directive.

What does it all cost?

Of course, the price depends on the scope and quality of your documents. Before starting the Docu-Check®, we put together a detailed quotation for you based on the documents to be checked. The practical structure of our checklist and the experienced editors enable us to perform the Docu-Check® quickly and cost-effectively – with the best possible results.

Summary:

The in-depth assessment, practical expertise and an attractive price make our Docu-Check® an essential document as part of your quality assurance process. The test mark, issued after completion of the Docu-Check®, emphasizes the quality of the checked documentation.
