OMICRON. Our more than 900 experts in 25 locations worldwide build smart testing, diagnostic and monitoring solutions. Energy suppliers and industrial companies in more than 160 countries rely on our solutions to make the generation, transmission and distribution of electricity safe and reliable. Trust, respect and fairness have remained important values in our daily work for 35 years.

For our Technical Documentation Team in our office in Klaus (Lake Constance region, Austria) we are looking for a

Technical Writer (f/m/x)

What is it all about?

- You create and edit user documentation and software texts in English for power system testing equipment
- You closely collaborate with developers and product management
- You analyze requirements and determine how to help and guide our customers
- You coordinate and supervise outsourced documentation and translation projects
- You help continuously improve our processes and terminology

What skills do you need to have?

- You have the ability to clearly and concisely describe complex technical matters in English
- You have an understanding of terminology and translation-related issues and how they may affect your workflow
- You have communication skills, capacity for teamwork, and the desire to learn new tools and technologies
- You have a degree in English, linguistics, technical communication, or translation studies (desirable)

What we offer?

If that sounds like a task that is designed for you – then apply via www.omicron.jobs!
